

The Model AP-01Z-02 with side vent works effectively on a small, 0.5 cubic ft. enclosure

Even the smallest electrical enclosures can be protected just as effectively as larger ones... AB-CO PURGE has the answer.

The small size of the AB-CO PURGE Model AP-01Z-02 unit makes it ideal for mounting to small enclosures such as the one shown. Ruggedly constructed of a 316 SS control panel and ¼ inch O.D. 316 SS tubing, the Model AP-01Z-02 is a Z-Type system designed specifically for small electrical enclosures with volumes up to 2 cubic feet (0.056 cubic meters).

For more information, or to request a technical data sheet about this unit, as well as other AB-CO PURGE units, contact us at 716.500.ABCO or visit our website at ab-copurge.com.

Benefits

- Reduces classification in a hazardous environment from Division 2 to unclassified
- Cost effective solution
- Extends equipment life
- Reduces heat build-up
- Eliminates dust containment
- Prevents moisture and corrosion
